Ankit Shukla

Transforming Businesses

I specialize in building both MVPs and fully developed mobile and web applications. With the ability to work independently, I ensure smooth execution and timely delivery. For projects requiring a broader range of technologies or larger scope, I also lead a dedicated full-time team equipped to collaborate on complex requirements. This flexibility enables us to deliver scalable, end-to-end solutions tailored to your business needs.

Hire Me!

Hello, I’m **Ankit Shukla** - a full stack developer with a passion for crafting impactful web and mobile applications. With hands-on experience delivering solutions for 50+ businesses, I specialize in turning concepts into reliable, scalable digital products. My approach goes beyond coding - I work as a true development partner, allowing you to focus on your business while I bring your ideas to life with precision and care.

- Top Rated Plus Upworker
- 50,000+ hours work experience
- 50+ Positive reviews across platforms
- 30+ Mobile apps submitted to store
- Custom Web Apps and portals for managing client's business and team.

360 Development Service | **Strategy & Consultation** | **Trusted by Customers**

My Offerings

My services are the good things that come to you in small packets. While this portfolio focuses on mobile apps, I’m equally skilled in developing tools that streamline daily operations and strengthen your business. My experience includes building custom SaaS web applications that enable clients to effortlessly manage their teams, customers, events, orders, invoices, and more.

Daily Relaxation and Mindfulness Companion

Pauz – Take a Break, your personal sanctuary for relaxation and mindfulness. This meditation app is thoughtfully designed to guide you through peaceful moments, helping you to unwind and reconnect with your inner self. Pauz is a thoughtfully designed meditation app that works in harmony with large, soundproof PODs installed in office environments. These PODs provide a dedicated space for users to relax, meditate, and rejuvenate. The app delivers a seamless meditation experience with a carefully curated playlist of audio tracks, managed through a robust admin panel.

Resource Management Platform

Keel Systems is a robust resource and workforce management web platform built specifically for companies operating across multiple job sites - particularly in construction and related field service industries. The platform was designed to eliminate the inefficiencies of tracking teams using outdated spreadsheets or manual coordination. It offers a centralized solution to plan, assign, and track team members across various locations, with an emphasis on visual scheduling, operational transparency, and ease of mobility. By streamlining how resources are allocated and moved between job sites, Keel helps companies stay agile, aligned, and prepared.

Construction	**New Zealand**	**Web App**	**AngularJS, Laravel, MySQL, Firebase**

FirstAid & Emergency Health App

iFirstAid is a must-have mobile app designed to put life-saving knowledge and emergency communication tools directly in the hands of users. The app offers verified first aid procedures in a swipe-friendly format, along with advanced features for real-time safety management. Tailored for both individuals and families, iFirstAid includes functionality for forming family groups, location tracking, injury logging, emergency broadcasting, and even vaccination tracking with reminders—making it far more than just a digital manual.

Project Management Solution

KEEREN DESIGN
Residential Architecture

Keeren Designs, a boutique residential architecture firm based in the United States, needed a streamlined solution to manage in-house operations, improve team coordination, and reduce time spent on manual tracking. We developed a custom iPhone application tailored specifically for their internal workflow. The app empowers architects and team members to set up projects, assign tasks, and track progress through a user-friendly interface. With the integration of a Gantt chart view and predefined workflows, the app significantly enhances project visibility and task accountability—making it easier for the team to meet timelines without the chaos of spreadsheets or third-party tools.

Productivity	**USA**	**iOS**	**Swift, MySQL, XCode**

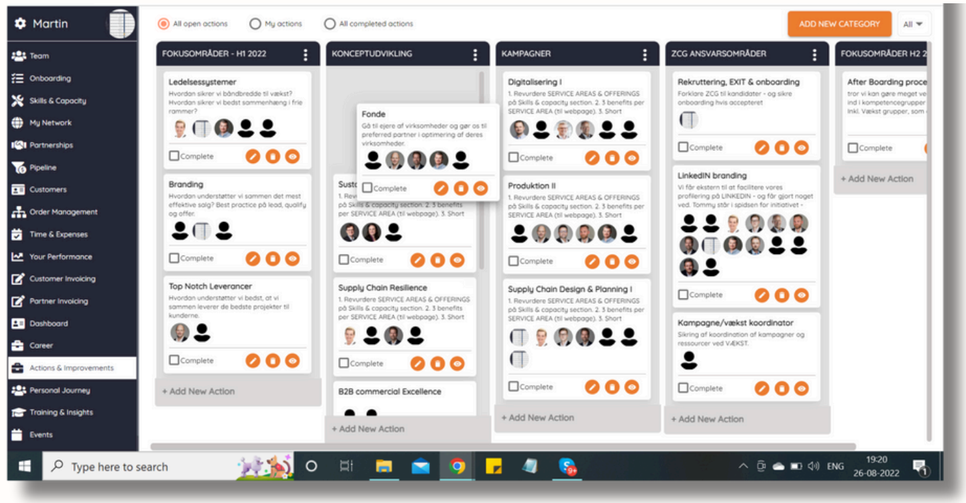

Workflow Automation Platform

Partner Domain is a robust, enterprise-grade SaaS web application developed for a Denmark-based consulting firm to overhaul their operational workflows. Previously dependent on manual, Excel-based systems to manage customer relationships, work hours, project tracking, and invoicing, the company sought a custom solution to digitalize and centralize their entire business process.

Business Management | Project Tracking | Time Logging | Invoicing Automation | Task Management | SaaS Platform

Enterprise	**Denmark**	**Web**	**Laravel, AngularJS, MySQL, Firebase**

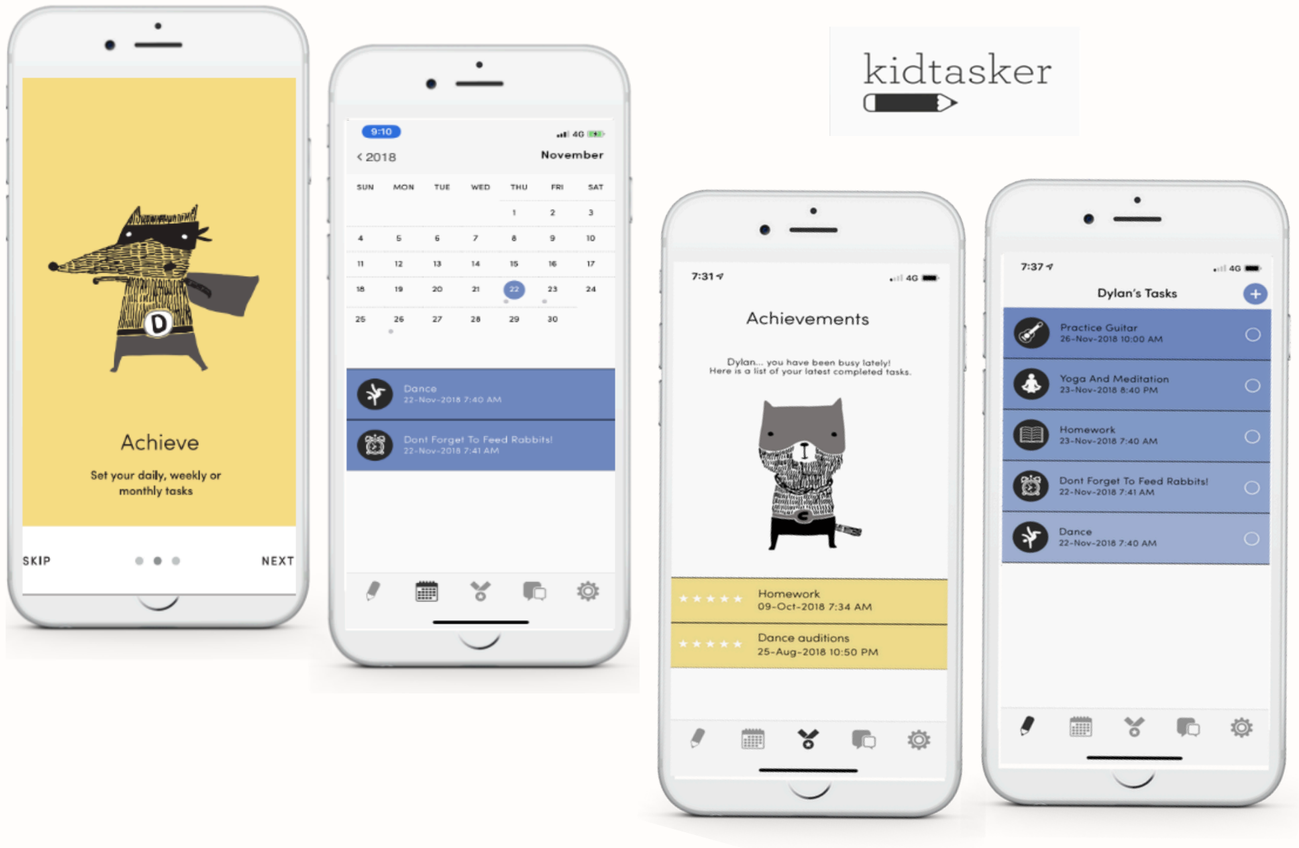

Task Reminder App for Kids

Kidtasker is an award-winning task and reminder application built specifically for kids, parents, and teachers. The app is designed to promote task accountability and organization in a fun, engaging, and user-friendly way. With its playful UI, including color-coded tasks and a child-friendly calendar view, it keeps young users motivated and informed while enabling adults to track progress and provide recognition.

Task Management | Parental Engagement | Group Chat | Education Tech | Reminder App | Calendar Integration

Legal Workflow & Collaboration Tool

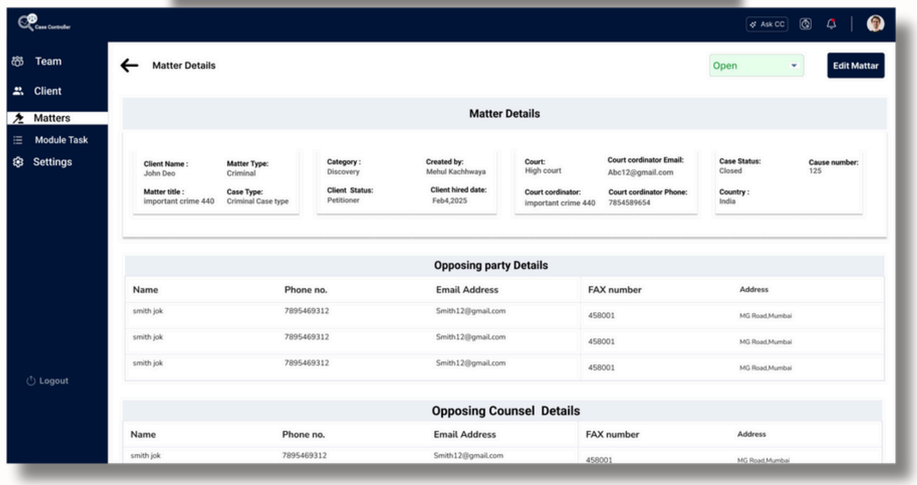

Case Controller is a robust web-based application designed for law firms and legal consultancies to efficiently manage their client cases, documents, internal tasks, and team collaboration in a secure and structured environment. Built as a multi-tenant platform, CaseFlow allows multiple companies to create separate accounts, ensuring complete data isolation and privacy for each organization. Within a company, different user roles—Super Admin, Company Admin, and Team Members—control access to features and data.
